EXPERIENCE

BETALECTIC

Stere

- Developed and maintained scalable APIs to manage insurance products from multiple companies
- Collaborated with cross-functional teams to design and implement RESTful APIs that met industry standards.
- Played a key role in documenting and explaining the APIs, making them accessible to other developers and reducing support inquiries.
- Used Turborepo, Nextjs, Tailwind, circleCi

Chickfillae

- Developed and implemented a custom D3.js data visualization design for Chick-fil-A, enhancing their data representation and analysis capabilities.
- Implemented a secure login system with robust authentication and access controls. The login functionality was designed to be efficient, allowing for quick and hassle-free access to the application, improving workflow efficiency for Chick-fil-A employees.
- Used Nextjs Tailwind, Redux, D3.js
